Security and guarantee

ATTENTION:Read the safety instructions before proceeding with the installation and use of the system. Keep this manual for future reference. Incorrect installation or placement of system elements can cause electrocution, short circuit, fire and other damage to the system. Be sure to use only accessories manufactured and/or supplied by KOOLNOVA, designed specifically for the use of this system and leave the installation to a professional.

- Only a qualified technician can carry out installation and maintenance activities.
- It is recommended to use only elements or spare parts supplied by KOOLNOVA.

- When placing the system elements in bathrooms, be especially careful not to place the elements inside showers or near humid places.

This product is covered by a legal guarantee. For any information about it, contact your dealer.

KOOLNOVA guarantees the conformity of the products to their technical specifications for a period of 2 years, parts and labor, from the date indicated in the certification of the product purchase document. The user can make the warranty effective at the distributor or point of sale or by calling the customer service telephone number. The noncompliant part or product will be repaired or replaced with an equivalent product at no cost to the customer. Any replaced part or product becomes the property of KOOLNOVA. The repaired product is guaranteed for a period of 6 months from the date of repair.

However, this guarantee does not apply in the following cases:

- Installation or use not in accordance with the instructions provided in this manual.

- Incorrect connection or incorrect use of the product, in particular with accessories not intended for this purpose.

- Abnormal wear.
- Failure to comply with the technical and safety regulations in force in the geographical area of use.
- Products that have suffered impacts or falls.

- Products damaged by lightning, power surges, heat or radiation sources, water damage, exposure to excessively humid conditions, or any other cause external to the Product.

- Improper use or negligence.

- Intervention, modification or repair carried out by a person not approved by the manufacturer or distributor subject to legal provisions. All warranties other than those described in this paragraph are expressly disclaimed.

1. General

₩

Stop

- System shutdown. The display does not show the mode.

(¹) for 2 seconds. - Press the button

NOTE: Frost protection function active (see page 11).

1.2. Functions

Graphic interface with 4.3" capacitive screen with metallic color finish. Functions:

- Powered by two-wire BUS without polarity.
- Zone On-Off.
- Shutdown of the complete system (MASTER).
- Setting the operating mode and thermal efficiency of the unit
- internal (MASTER)
- Indoor unit temperature and speed control.
- Reading of the ambient temperature and the % relative humidity of the area.
- SLEEP function.
- Hourly schedules.
- Remote access and control of other areas of the system.
- 6 languages (Spanish, Italian, English, French, Portuguese, German).
- Adjustable brightness.
- Frost protection function.
- Window contact.
- ECO mode to reduce the building's energy consumption.

The KOOLNOVA system has a freeze protection function, which activates the system when the temperature measurement in any of its zones is below 10°C, to prevent the heating/cooling system from freezing.

Please note that the frost protection function is not active by default, if you wish to activate it. However, if the system is in STOP mode, the frost protection function will no longer be active. To protect the treated rooms from various cold and damp diseases, we recommend leaving this function active.
